

Briefing Note for Calne CATG

Area Board Issue 3-22-8 – C50 Blacklands – Request to review Horse and Rider Warning Signs

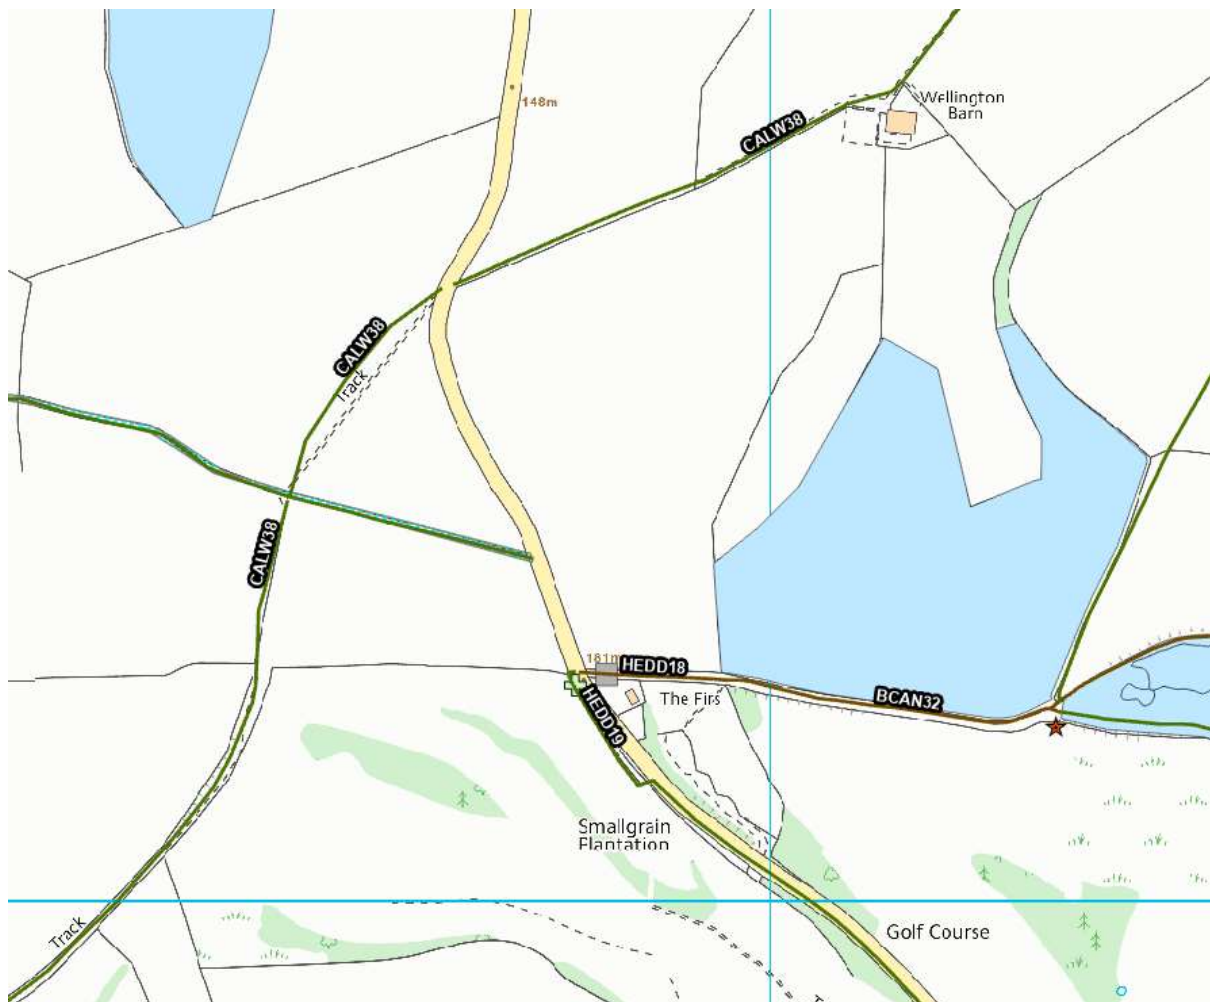

Background

The area of concern is approximately 1 mile in length and is situated between Blacklands Crossroads and the Small Grain picnic area.

The C50 is predominantly rural in character, is subject to the National Speed Limit and has no system of street lighting. Traffic Volume is significant at peak times as the route provides an important link between Calne and Devizes. Off-peak levels are much lower.

The extract plan below shows where Bridleways and Byways meet / cross the C50 within the area of concern.

The LHFIG has asked officers to consider warning signs for Horse and Riders.

Current Provisions

A site inspection has found that a pair of Horse and Rider Signs are already provided, 1 northbound and 1 for southbound traffic, as shown on the extract below:
