

Background

During the summer it was noted that the two dog waste bins currently provided in Lower Compton were getting full before the routine weekly empty.

Quotes were requested to see how much it would cost to increase the emptying to twice weekly for both of these bins.

The final quote has now been received and comes in at £4.10/empty, meaning an extra £8.20/ week on bin emptying.

There is approximately 18 weeks left of this financial year (From December 1st) increasing the bin emptying spend by around £147.60 (depending on when the increased emptying were to increase)

These costs would be in addition to the extra £4.10/ week the council have committed to spend to empty the new bin being provided in Lower Compton.

Recommendation

Council to consider the report and decide if they wish to commit to the additional bin emptying request and subsequent costs.
