

**Maintenance of the Well House, Old Derry Hill.**

**Background**

The parish Council is the custodian of The Well House located on Old Derry Hill. Earlier in the year the council requested Wiltshire Historic Building Trust to carry out a survey of the structure. They identified works to be completed as set out in the report attached to the end of this document.

A contractor has been found who is able to carry out these works and we have received a quote of £350 to attend site, check tiles and refit the lead capping using existing lead clips.

We are still looking for someone who is able to create a replacement finial.

**Request**

That the council approve the £350 quote for the roof work and preapprove the acceptance of a quote for the finial works to a value of up to £500.
